(i)INTRODUCTION TO THE COMPANY

PRIYA HANDLOOMS, KARUR, Tamil Nadu (India) based organization is engaged in manufacture and export of a wide range of Garments that includes table linen,kitchen linen , living linen, kitchen towel set,outdoor and more. They are a old partnership firm established in t03/july/1996 and have been serving a large number of clients across the markets of **East Europe, North Europe, South / West Europe and North America**. The company has been manufacturing a range that is superior in terms of quality, stitching, designing, perfection and accuracy.

Their Products are manufactured using fabrics which are skin-friendly, threads and other essential raw materials sourced from reliable industrial vendors associated with us. Experienced R &D department functional with them has been a reason for our abilities of experimenting with the facilities and fabrics available with them. These experiments have been the reason that they have been successful in creating a new range that is unique and unmatched in different terms. Good Financial Position of the company allow them to follow the **TQM (Total Quality Management)** parameters at their end, hence allows to carry on with quality monitoring work at their end. The Large production capacity has been the reason for their success in the industry.

We are guided on the frontiers of the industry by an able guide V.SANDHIYA , HUMAN RESOURCE of our company. She is the person with great professional experience and abilities of guiding the team as an expert whenever and wherever required. Her able support has helped them in marching ahead on the stairs of success with a great speed. The company is backed by an able team of designers, tailors and quality experts. These professionals working in coordination with each other create a flawless range that is free from defects of all types, potentially superior and serves well to the requirements of

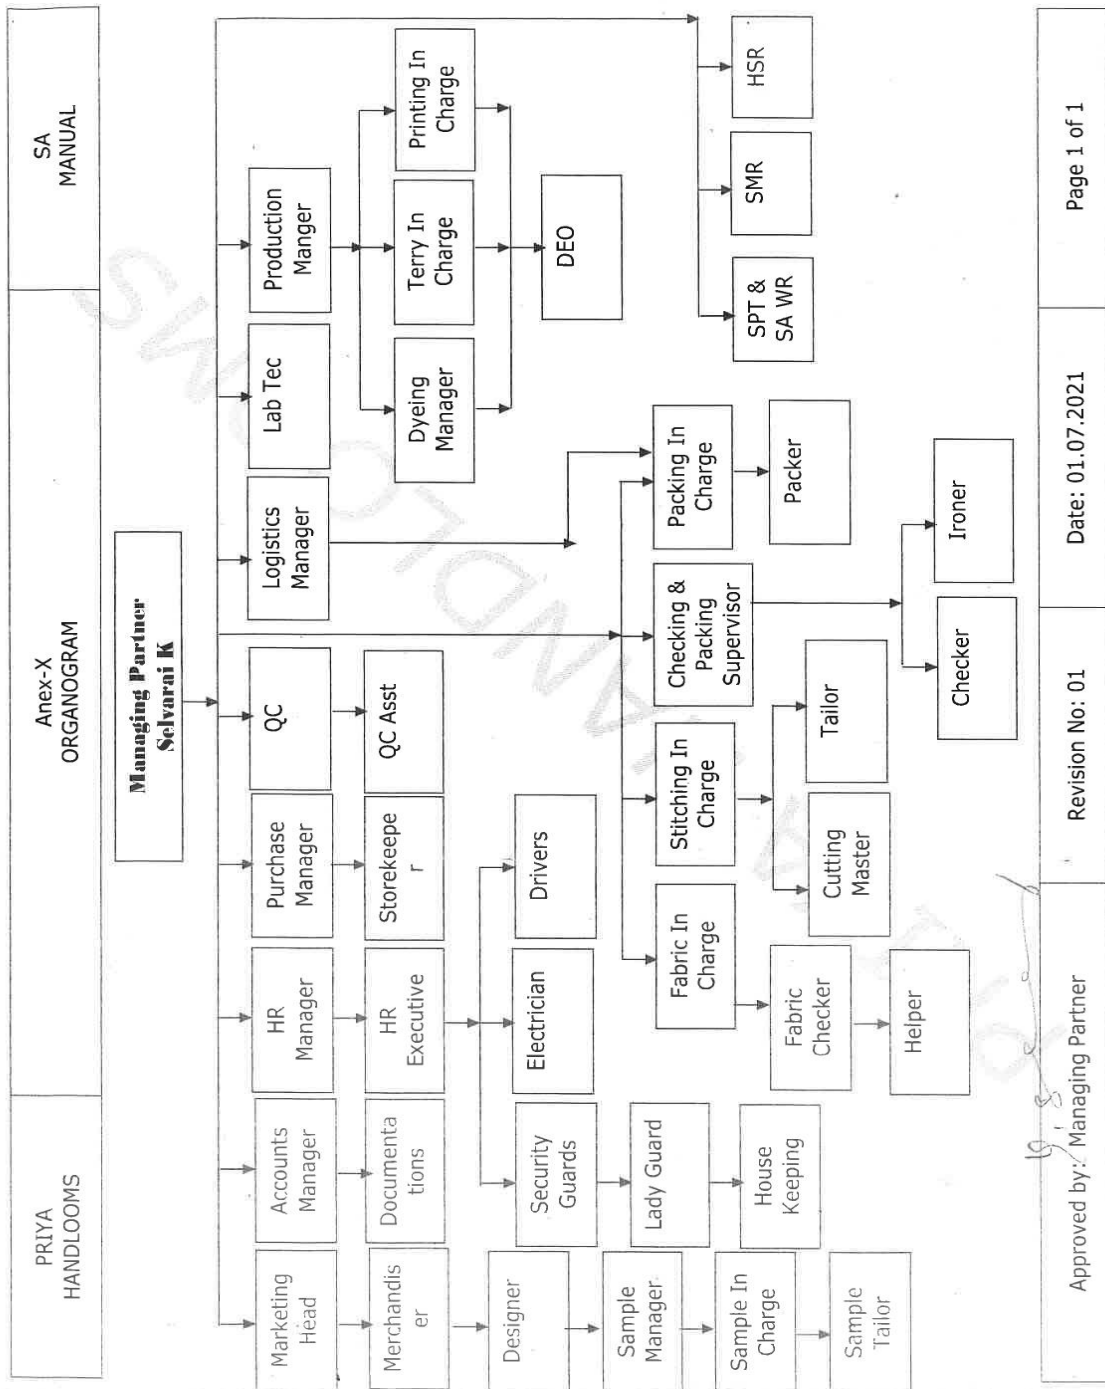

clients. Apart from this, the sales and marketing executives in support to the distribution agents have allowed them to serve the clients with products on-time. Everything, they do is to ensure client satisfaction.

Priya Handlooms, Karur has over 27 years of experience in knitted garment manufacturing and is now turned into a Recognized one Star Export House. The company has its dedicated workforce consist of management people as well as planning, programming, sampling, quality assurance, technicians, controllers and inspectors. They are accustomed to international standards and modestly claim that all their business come as repeated business or reference made by their esteemed satisfied clients. Apart from regular and standard jobs, they also undertake special jobs. They have established excellent own source of Processing, Printing and Production unit with latest technology incorporated. The dedicated and committed work force gives them the leading edge to cater to the changing needs of the market.

(v)BRIEF INTRODUCTION TO THE DEPARTMENTS

1.PRODUCTION DEPARTMENT

The production department deals with the different stages and process in converting raw knitted fabric into finished garments. Majority of the process are done by production department itself. They are responsible for producing goods very effectively without any faults and on time.

2.MARKETING & SALES DEPARTMENT

The main motive of this department is to identify the buyer or consumer's needs and to make the products that meets their needs at a profit. And they also deal in advertising the products, transportation of finished goods. They create good reputation among the buyers.

3.ACCOUNTS & FINANCE DEPARTMENT

The finance department deals with allocation of resources and planning budget for the indirect expenses of the company. The accounts department deals with maintaining bills like sales, purchase bills etc... and also, they are responsible for giving salary, releasing payments and asking for payments from the customers

4.HUMAN RESOURCE DEPARTMENT

This department deals with Human Resource Planning, Recruiting and responsible for making a better environment for the employee.

5. ADDITIONAL DEPARTMENTS

✧ PURCHASE DEPARTMENT & STORE

The purchase and store department are responsible for maintaining raw material. Their main motive is that the production should not stop due to insufficient raw materials. They play a major role in selecting the right suppliers, maintaining long term relationship with the suppliers, placing order at right time with right person and also plays a vital role in bargaining & negotiating.

✧ DESIGNING DEPARTMENT

This department deals with the designing the garments which is in the current trend and the designs that attracts the target customers. They also help the marketing department for creating advertisements and posters and also help to create some different(unique) style of pattern for pattern making section thus very useful for production department.

✧ QUALITY CONTROL DEPARTMENT

The QC department is responsible for maintaining the quality of the goods and to identify the damaged goods. And also responsible for providing superior quality products. The check whether the products meet the standards.

✧ RESEARCH & DEVELOPMENT

This department of the company is responsible to understand the taste and current trend in the society and they develop new innovative fabrics, garments which are unique and sustain in the market.

✧ **MACHINE MAINTENANCE**

The members of the department do many functions like cleaning the work environment by lower-level labours, machine service engineers perform maintenance works on regular basis and address the technical and big issues of the machinery when necessary, and they also have members to maintain transport vehicles.

✧ **DOCUMENTATION DEPARTMENT**

The documentation department have highly qualified staff they deal with the government certificates, legal and quality standard certificates that the buyer asks.

(vi) DETAILED INFORMATIONS ON DEPARTMENTS

1) PRODUCTION DEPARTMENT

production is a very important and highly technical area in an organization which can be divided into several units. the meaning of production means conversion of raw material as fabric into finished goods as garments.

The major function of this department is managed by the production manager according to buyers requirement the present market survey and marketing department details are collected regarding the pattern measurement and way to produce a garment from a fabricated cloth.

➤ PRODUCTION PROCESS

- ❖ FABRICATIONS
- ❖ CUTTING
- ❖ SEWING
- ❖ STITCHING
- ❖ CHECKING
- ❖ IRONING
- ❖ PACKAGING

➤ **FABRICS SECTION**

The fabric section receives fabric from the head office. The purchase of fabric section was managed by purchase manager.

In fabric section they relax the fabric for 24 hours relax is normal relaxation. The maximum time of relaxation is 48 hours. The time is varied according to their cloth nature. They maintain shade approvals.

The controller gives the report after fabric is tested. If the test is acceptable by the lab, it will ready for cutting section otherwise it will be sent to reprocess to correct with the mistaken fabric.

FABRIC SECTION

➤ CUTTING SECTION

After sourcing of the fabrics then the fabrics comes to the cutting department. The cutting departments work is to cutting of the fabrics and sending it to the sewing section. The cutting of the fabric is planned according to the daily requirement of stitching line.

The cutting supervisor receives the tested fabrics from fabric section. Also obtains pattern board from pattern master, and then they will provide it to the cutting master they will cut the fabric into the specific or required sizes and length.

The cutting process is done in bulk(4 inches of fabric is cut in bulk).For cutting design ash is prepared.Ash is a cardboard which is cut according to the design exactly .

CUTTING SECTION

➤ SEWING SECTION

After receiving the garments components from cutting section, all the garment parts are joined and sewn as frequently.

Sewing section is the most important departments of a garment manufacturing industry. Sewing machines of different types are arranged as a vertical line to assemble the garments.

SEWING SECTION

➤ **STITCHING SECTION**

After the cutting process, it is sent to stitching, there are different machines for different purposes like over locking , button fixing, normal stitching , piping. Every time is done according to the design.

In stitching the cut fabrics are brought and then it is over locked by using over lock machine .stitching is done in batch. then the over locked fabrics are stitched according to the design given by the buyer and then the accessories like hooks , buttons .then it is fixed through machines either manually or through machines. after the product is stitched .then after the product is stitched. the excessive threads are controlled and each product is event under quality control checking. if there is any defect found in the product , it is separated again and sent for corrective stitching .

➤ **THE MACHINES USED ARE**

- ❖ JUKI
- ❖ SIRUBA

JUKI MACHINE

➤ **QUALITY AND CHECKING SECTION**

The checking section is most important section in the production department. If any careless made in this section then the mistake piece will get shipped and the customers will not get a properly finished cloth. The checking department inspects the quality of the fabrics in each process and ensures that the quality suppliers asked in the fabrics. There is a constant check in the goods imported and they check the machines in a schedule base that it works without any damages. The quality checking department are who work to control quality and responsible for quality control and quality assurance.

Each and every stitched piece of garment will be checked with the fabric weight, stain, hobs, piece weight accessories position, loose thread parts positioning depends upon the requirements.

➤ **DUTIES OF EMPLOYEES OF QUALITY CONTROL DEPARTMENT**

- ❖ Create standards for output products .
- ❖ Give a set of step-by-step instructions to help workers carry out routine operations .
- ❖ Quality Assurance .
- ❖ Eliminate items that do not meet standards .
- ❖ Make sure the quality of the fabric received by the cutting department is the fabric without defects. If there is a minor error in the fabric, this department will mark it up and give the solution to the cutting department .
- ❖ Reporting and conducting meeting on output product quality.

QUALITY CONTROL DEPARTMENT

➤ **DYEING**

Here the process of dyeing involves several steps like:

- ❖ Singeing and designing
- ❖ Bleaching
- ❖ Dyeing

➤ **SINGEING AND DESIZING**

Singeing is a process that involves passing the fabric through a flame or a hot plate to burn off any excess fibers, yarn ends, or impurities on the fabric's surface. This process:

- ❖ Removes excess fibers and yarn ends.
- ❖ Gives a smooth surface finish.
- ❖ Enhances fabric appearance.
- ❖ Can be done on cotton, polyester, or blended fabrics.

Desizing is a process that involves removing sizing agents (such as starch, gelatin, or synthetic polymers) from the fabric. Sizing agents are applied to yarns during weaving to improve their strength and durability. Desizing:

- ❖ Removes sizing agents to prepare fabric for dyeing or printing.
- ❖ Improves fabric absorbency and softness.
- ❖ Can be done using chemicals, enzymes, or heat treatment.

➤ **BLEACHING**

The company has a very large bleaching unit. Bleaching is the process done before dyeing that is nothing but converting the grey (Cora) fabric into white fabric. This process requires lot of water. To run this machine the minimum requirement of water is more than 1000 liters and it is also an expensive process. They can bleach more than 6 tonnes of fabric per day. Bleaching is the process of decolorization of raw textile material by removing inherent and or acquired colouring components from the fibre. It provides base whiteness to the textile material which could be further whitened with the help of optical brighteners or dyed printer depending on the desired end use.

➤ **DYEING**

In dyeing unit they have lot of dyeing machines both sample dyeing machines and large dyeing machines of different size. The dyeing of a textile fibre is carried out in a solution, generally aqueous, known as the dye liquor or dye bath. For dyeing to have taken place, coloration of fabric and absorption are important determinants. They ratio of chemicals and colours that they want use is calculated from sample dyeing process. In dyeing machines, the fabrics were put into it and chemicals as well as dyes were added and water is added based on type of fabric and also based on intensity of colour and allowed to dye for 4-8 hours based on fabric type as well as colour. The outlet water wasted in dyeing is used for other activities.

➤ **PRINTING**

The dyed fabric is next sent for print.here printing is done through four different process:

- ❖ SCREEN PRINT
- ❖ PIGMENT DIGITAL
- ❖ REACTIVE DIGITAL
- ❖ CMYK(CYON , MAGENTA , YELLOW , BLACK)

➤ **SCREEN PRINT**

1. TABLE PRINT
2. ROTARY PRINT
3. BLOCK PRINT

➤ **TABLE PRINT**

- ❖ A flatbed printing technique.
- ❖ Fabric is laid on a table and printed using screens or plates.
- ❖ Suitable for small to medium print runs.
- ❖ Good for intricate designs and details.

➤ **ROTARY PRINT**

- ❖ A continuous printing technique.
- ❖ Fabric is fed through a rotary press with engraved cylinders.
- ❖ Suitable for large print runs.
- ❖ Fast and cost-effective.

➤ **BLOCK PRINT**

- ❖ A traditional printing technique.
- ❖ Hand-carved wooden blocks are used to apply designs onto fabric.
- ❖ Suitable for small print runs and unique, handmade designs.
- ❖ Often used for artisan and craft textiles.

➤ **PIGMENT DIGITAL**

- ❖ Uses pigment inks that sit on the surface of the fabric.
- ❖ Suitable for cotton, polyester, and blends.
- ❖ No need for pre-treatment or steaming.
- ❖ Good for:
 - Dark-colored fabrics.
 - Soft, pastel colors.
 - Photo realistic images.
- ❖ Limitations:
 - May fade over time.
 - Can be prone to crocking (color transfer).

➤ **REACTIVE DIGITAL**

- ❖ Uses reactive dyes that penetrate the fabric.
- ❖ Suitable for natural fibers like cotton, silk, and wool.
- ❖ Requires pre-treatment and steaming to fix the dyes.
- ❖ Good for:
 - Bright, vibrant colors.
 - Soft, breathable fabrics.
 - Sustainable and eco-friendly.
- ❖ Limitations:
 - Requires additional processing steps.
 - Can be prone to color shifting.

2) MARKETING & SALES DEPARTMENT

Since, the company is well established and getting repeated orders (i.e.) mostly the order is the repeat of the previous order they have done earlier so they don't focus on marketing to get new buyers. They are often getting buyers through referral from the existing buyers. And they also follow different strategies to market their products.

For marketing they use the quality certifications and they use different methods for different targeted customers to market their products.

Let's consider a buyer from Asian countries their mentality is mainly focus on cheaper products so they market their products by giving good quality product by cutting costs at different places at very affordable price when compared to other competitors. Thus, they work and use different strategies for different buyers.

When the buyers are from US or any other European countries their mentality is to get very superior quality products so they market the very high-quality products with these buyers who doesn't bother about the cost much. They too produce very unique and quality product for those buyers. They use quality as a key to market the products with these buyers.

➤ CREATING THE GOOD REPUTATION

Primary aim of the marketing department is to create good reputation and good will among the customers about the organization. Secondly, they must make aware and ensure that the customers and consumers know about their products and mode of operations that the company does or operates. And they must make the people to know about the products and services. Also, should ensure whether their works reaches their target people.

➤ ANALYSING THE REQUIREMENTS

They just talk with the sellers (showroom owners) and with buyers, also analyse the trend in the society, mainly they should analyse the needs and wants of the customers also they design many catalogues of their products. After analysing the wants they come up with new ideas and inform Research and Development department to develop a new product.

➤ **PROMOTION**

The members of the marketing department are responsible to create product list and to show product specifications. For different customers they will adopt different strategy of creating catalogue. And different methods of sales strategies. Let's see the strategies followed by marketing department below.

1. SAMPLE PROMOTION

2. ADVERTISEMENTS

1. MAGAZINES

2. NEWS PAPERS

3. E- ADVERTISEMENTS

4. SPONSERING

➤ **CREATING PRODUCT CATALOGUE**

The members of the sales department create some product catalogs to promote their products in different styles. There are three types of catalogs created by the marketing department in the company they are;

1. SMS CATALOGUE

2. GENERAL CATALOGUE

3. SPECIFIC CATALOGUE

➤ **DISTRIBUTION & TRANSPORTATION**

The marketing department is responsible for distributing and transporting the finished goods. The company has excellent transport facilities and has own vehicles for transportation and has very good logistics department they directly take the finished goods and transport them till the harbours. Also, they also take the responsibility of carrying the goods and delivering it. And the company can take responsibility of giving the product to the place that they ask.

➤ **PRICING & COSTING**

The members of marketing department are responsible for creating quote and responsible for costing. Once the order comes the members of marketing department discuss and create cost sheet also works on pricing. After costing they create quotation and give to the buyer. If the quote is okay for the buyer, then they will proceed with their work.

➤ **RELATIONSHIP**

The members of this department are responsible for maintaining relationships with buyers, customer, consumers and other stake holders. They perform the work outside the organisation same what does HR department does inside the organisation like solving problems, grievance addressal etc....

➤ SALES

The sales representatives of the company are responsible for getting orders from the local buyers and other buying offices. They go and meet, and do aggressive selling of their products. They plan to give offers when the company has less orders (i.e.) during off season. Also, they do some stock clearance if they fail to sell the cancelled ordered or other products.

COLLECTING REVIEWS AND FOLLOW UP

They are responsible for collecting reviews from the customers and to change the product design as well as address the issues of the consumers regarding the product.

LOGISTICS

These department staffs are responsible for transporting the goods from the production unit to shipping or to the buyers. The transport bills are kept as record and will be given to accounts department for billing those transportation bills along with the bill of production.

STORAGE AREA

(3) ACCOUNTS & FINANCE DEPARTMENT

Maintaining accounts is an important function in every trading without proper accounting they cannot know their position or financial level and stock levels. Accounts department is headed by the Finance Manager (finance and accounts) and his team of efficient accountants. They maintain record for each and every transaction relating to business. All the financial decisions taken are reviewed by the managing director before being put into action. This department is in charge of all the tax computation involved with any local purchase and sales made. The financial year of the company starts from 1st of April and ends 31st of March every year. The accounts department also computes the weekly wages and monthly salaries for the employees of the company.

This department maintains all accounts and provisions of the company. Particularly, the accounting manager enters the inward to the company, balances the expenses and sales and calculate the proportional cost for each day. The department maintains prepaid provisional expenses of the company, if the cash needs are beyond the working capital. It is the duty of accounts department to raise finance for a long-term period. They ensure whether right salary is given to employees and give them bonus or incentive with the reward system. They take into account all the transaction from raw material to transportation. Here, the cotton wastes are exported to another mill where they earn through this. So, they maintain waste management record separately. They have a flow of communication with the production manager in order to reduce and cut the cost of frequent machinery repairs where it reduces the expenses on machineries. The accounts department takes care about collecting the debts and amount to be received and tries to reduce loss as much as possible. They plan a strategic financial plan to meet an unexpected situation. Finance department provides information on the current and future financial status. They prepare some reports to analyse the financial position of the organization. Some reports prepared are balance sheet, trading and profit and loss account, depreciation statement, profit allocation account etc. The finance department is responsible for preparing budgets for a financial year. The object of budgeting is to plan and control the company's activities so as to maximize profitability. The challenge of finance department is to minimize the cost and maximize the profit of the investment. Financing is required for different stages of business. Financing is required for maintaining the operational expenditures.

➤ **PAYING FOR MATERIALS**

The purchase department of the company will provide the bills of their purchase of product and materials. They will evaluate the purchases and process the bill then they will release the payment for the material purchased.

➤ **PAYING FOR OUTSOURCING**

For outsourcing of services and products like knitting they will send their bills directly to this department. The members of this department will check with the merchandiser who outsourced the service and then process the bills, also pay to the service providers.

➤ **PAYING INDIRECT CHARGES**

They pay for indirect charges of the company like vehicle service, water, Electricity Board bills and all other indirect charges, Insurance charges.

➤ **COSTING**

They help the marketing department in costing by comparing and showing the current price of the materials used in that product which helps them to create costing.

➤ **MAINTAINING PETTY CASH**

They are responsible for maintaining petty cash which is required by each department in buying some things, for paying outsourced service engineer who works for them only when required. And for paying the people who spent their own money for company purpose and providing the bill receipts to get their spending. For example, a sales agent pays for petrol in bunk if he brings and give bill of it in the company then the company will refund him the amount he spent. They will also pay the workers who get advance by getting voucher signatured by the MD.

➤ **RECORD MAINTAINING**

This department is responsible for maintaining all the records of income as well as expenditures of the company. The department maintains many books like petty cash book, cash books of all the departments, purchase book, sales book or bill book. This department also have the copy of received book, delivery book and other financial books of the company. As record maintaining and record keeping is the important work in the business to calculate profit or loss of the firm it's very important to note all the monetary as well as non-monetary transactions of the business. They also have the records of quotations received as well as the quotations given to the buyers by us and additionally the Process Order that they received from the buyers. The process order is the sheet which contains all the details of the order like quantity, price, date of order and other order details and they also mention the date of delivery.

ACCOUNTS DEPARTMENT

➤ **BILLING**

This department is responsible for creating bills and does the process of billing by seeing the process order and quotation rate and they will bill for the quantity of goods delivered by checking the delivery records and also, they add other expenses like carriage and transportation charges in the bill mostly they include land transportation charges till harbour after that the buyer directly pay for shipping charges. This department is also responsible for making voucher, and other materials that is used for financial transactions.

➤ **GETTING PAYMENT**

The members of this department are responsible to handle the debtors and creditors of the company. They will communicate with the creditors regarding when will the company will pay its creditors and also, they will handle them for payment. Getting payment from debtors is very difficult unless we force them and request them so they will remind the to process the bills that they had given to them. Also requesting them as well as offering like giving discounts for quick payment will also be decided by this department.

➤ **SUBMITTING BILLS**

This department members are responsible for submitting the bills and other transaction receipts that they need to file with the auditor. They also should provide the records of each and every expense of the company to show their genuine turn over. Priya handlooms is paying proper tax and also showing their proper income and expenses with the government. The GST returns filing and other functions were taken care by the auditor with help of records maintained by the accounts department of the company.

➤ **BANKING**

Communicating with bank and handling the bank transactions. For going to the bank as well as for handling bank work they have a member who will do all the works like withdrawing cash from bank and depositing cash in bank, depositing cheques and also collecting cheque or DD and some other activities are taken carried by that person who belongs to that department.

➤ **BOOK MAINTAINED**

- Purchase Book
- Sales Book
- Cash Book
- Purchase Ledger
- Sales Ledger
- Creditors Ledger
- Debtors Ledger
- Profit and loss account
- Balance sheet

ACCOUNTS DEPARTMENT

(4)HUMAN RESOURCE DEPARTMENT

This department undergoes many functions like recruiting the employees and analysing the number of employees needed for the work and also for negotiating the salary and also deals with the training of the employees. They maintain the attendance of the employees and for providing the facilities and safety measures the employee needs. They are the main link between the labours and the management. They securities and transport drivers also report directly to this department. The receptionist is the important staff whom the labours directly report. Some of the works undergone by the members of the department are listed below:

RECRUITING

➤ RECRUITING METHODS

The managers of different departments directly report to the HR manager for the regarding the number of staff needed and also what are the skills they required, as well as how long they are assigned. Based on the future plans of the company and by analyzing the market, and the orders they have the HR team and MD decides the number of employees needed to do the jobs. Most often the company recruits the employees those who were referred by the former employees in the organization 70% of the new employees were came through the recommendation of former employees but this is concerned with high level staffs and they also give advertisements for recruiting labours like foreman, supervisor as well as talented staff, and for the work which needs special skills. When concerned with very higher-level management like managers they are sure that they will not leave the organization in case if they leave the organization the most experienced and long term trust worthy staff will fill their seats. When we concern with lower-level employees, they take some temporary workers.

These workers will be employed in temporary and sometimes in permanent basis. Usually, semi-skilled labour will be there in this department. And these workers were mostly appointed in contract basis and from the man power agencies who supplies these semi-skilled labours some were long term employees among these members.

These were the recruiting methods adopted by the company for appointing labours in different positions. Now let us see the processes adopted by the company for different positions in the company.

RECRUITING PROCESS

FOR LOWER-LEVEL WORKERS

The HR manager asks with the man power suppliers and labour contractors for lower-level workers and for semiskilled workers. In case of emergency and insufficient labour supply they also advertise in newspapers and in the places which is in their locality.

FOR MIDDLE-LEVEL WORKERS

The company usually hire the middle level employees like supervisors, foreman, main operators and other important workers mainly through former employee's suggestion and recommendation also very few may promote from lower level. When more employees are needed, they advertise much in newspapers and some means like giving pamphlets and sometimes even in fairs. In recruiting process, the candidates were called and will be asked regarding the experiences and sometimes they will be asked to perform some jobs, for example when they are selecting the candidates for merchandiser, they will ask the candidate to analyse a garment and also ask them to prepare the tech-pack of that garments, and ask many details regarding the fabrics based on his knowledge he will be selected. Similarly, when they are selecting the candidates for accounting, they will ask them to do some works like billing, salary allowance calculation etc... So based on the candidates they are recruiting for the department the recruiting process will change. As they are mostly recruiting experienced candidates for middle level they also ask about his or her behaviour in previous organisation where he or she worked. For fresh candidates they ask for reference but they select freshers very rarely as they ask for practical knowledge. Finally, they just check with their documents for a formality. Then the recruited candidate will be trained and will do his or her job.

FOR TOP-LEVEL WORKERS

They told they will never go for outsiders for replacing top level workers. Usually, the employee in next level will be promoted to that level. The company gives importance for the discipline, loyalty than skills when concerned with top level management. So, there is no need of recruiting in top level.

➤ **TRAINING AND INDUCTION**

There is no need of much training as the company usually recruits experienced candidates however, there is a need for training in some departments like accounts, marketing and production. They will assign a senior employee as new employee's trainer and ask them to be with them, also to get to know about their functions in the organization. And during the training period itself they will be adopted and introduced among the employees. Assigning right trainer and tracking the performance of the employee is the work of HR staff.

➤ **GRIEVANCE ADDRESAL**

All the problems of the employees will be addressed by the staff in the HR department. And they will investigate the problem and give solution to those problem. Mostly the receptionist of the company acts as the grievance addresser and settle the dispute of the employees. If the problem is with the organization rules or with the management the HR manager will be the direct addresser of the issues and take into MD's concern and also gives solution to the problems very quickly.

➤ **FACILITIES OFFERED**

MEDICAL FACILITY

There will be many first aid boxes all around the factory and also the receptionist will have some basic tablets which is essential like cold, fever, head ache, cough, stomach ache and some other tablets. Any medical emergency will be addressed by the HR department itself. And some employees were undergone training for providing basic medical assistance.

SAFETY FACILITY

There are many safety alarms inside the factory and fire extinguishers inside the company. And in the floors, there are some safety lines which are marked in yellow an red paints which is completely necessary to get some safety and quality certificates from the governmental organizations. Also, these safety lines ensure the safety level of workers as where they need to work and can walk. Usually, yellow line denotes organic material storage which has no side effects and no needs precaution but red line denotes inorganic materials and also needs safety measures to get inside it. All these works are carried by the HR department.

TRANSPORT FACILITY

The company provide some staff van for the travel of staff near some areas mainly for women employees and they ensure the safety of them also. They provide logistics to carry the raw materials and finished goods and that transportation is managed by HR manager itself. The company also provide office vehicles (bikes) for sales man, marketing agent and also for merchandiser also they accept the travel allowances. These facilities were provided by the company through HR department.

TOILET FACILITY

The sanitation and other facilities were very neat and clean in the company and has good water source to use. The maintenance of toilets is also done by HR department staff itself.

INSURANCE FACILITY

Employee State Insurance (ESI) benefit is given to the permanent workers and for all the staffs. It is a self-financial social security and health insurance for Indian workers. The organisation itself directly pay the premium of the insurance for the employees. And also, they deduct some amount as PF from the monthly salary of the employees.

DISCIPLINARY ACTIONS

The HR department takes action instantly in case of any disciplinary issues. MD itself one among the board members of the HR department's Disciplinary committee. They are more concerned with discipline of the members.

PERFORMANCE TRACKING

The members of the HR department have the track record of the employee's performances and they provides rewards and extra incentives based on their performance. Mostly members of marketing get extra rewards in the company. And also, they motivate the employee by conducting some refreshment programs. They too find the places where the employee is lagging and train them accordingly. Their aim to have good morale and motivation in the employees.

(6)ADDITIONAL DEPARTMENT

● PURCHASE DEPARTMENT

The purchase department acts as the primary buyer of goods and services to the company. There are different supervisors for purchasing the required materials for each department. The department supervisors are responsible for purchasing the necessary goods for their own departments.

A purchasing manager works at the head of the purchasing department, managing the department's workforce and interacting closely with the top management to plan and control the budget. To better understand department demands and the significance of their purchases play in the firm, the buying manager will maintain constant communication with them. The purchasing manager oversees the activities of purchasing officers, purchasing agents, and purchasers. Depending on the tasks, their duties and responsibility may change.

MANAGER:KARUPPANNAN

RAW MATERIAL USED

- ❖ THREADS(YARN)
- ❖ FABRIC

These two are the main raw materials used in this process.

RAW MATERIAL USED IN PACKAGING PROCESS

- ❖ LABELS
- ❖ HANGTAG
- ❖ STICKERS
- ❖ COTTON BOX
- ❖ POLY BAG

ACCESSORIES UNDER

- ❖ POM POM
- ❖ BOW
- ❖ BUTTONS
- ❖ RIBBON ETC...

RECORDS MAINTNED BY PURCHASE DEPARTMENT

- ❖ Basic sample collection list
- ❖ Sampling test result note
- ❖ Purchase confirmation register

PURCHASE DEPARTMENT

VENDORS/SUPPLIER DETAILS

- ❖ Rathana Yarns Traders
- ❖ Jaisakthi Agencies
- ❖ Ramkumar Yarn
- ❖ Jyotimaye textiles pvt.ltd
- ❖ Shri Vengaraiamman yarn Agencies
- ❖ Jt Fabrics pvt.ltd
- ❖ Senthil Kumar Textiles

SUPPLIERS OF RAW MATERIAL FOR PACKAGING PROCESS ARE:

- ❖ Tamil nadu off set
- ❖ Kalaimagal Labels
- ❖ M.Pack
- ❖ Adithya packers (cotton bags)

Store is used to keep the packaging materials organized and segregated. The segregated and organize the materials like:

- ❖ Poly bags
- ❖ Cotton box
- ❖ Accessories
- ❖ Labels

Coding of the products are either given specified by the buyer or it is coded by the management according to their needs. there is LIFO / FIFO method followed in the organization .stock is replenished/restocked according to the use of existing materials and need for stock. they buy their raw materials in bulk. so there is no need for restocking at a shorter period. they have a point until which they don't need stock. if the point is reached then the restock is done. this is applicable for both production and packaging raw materials.

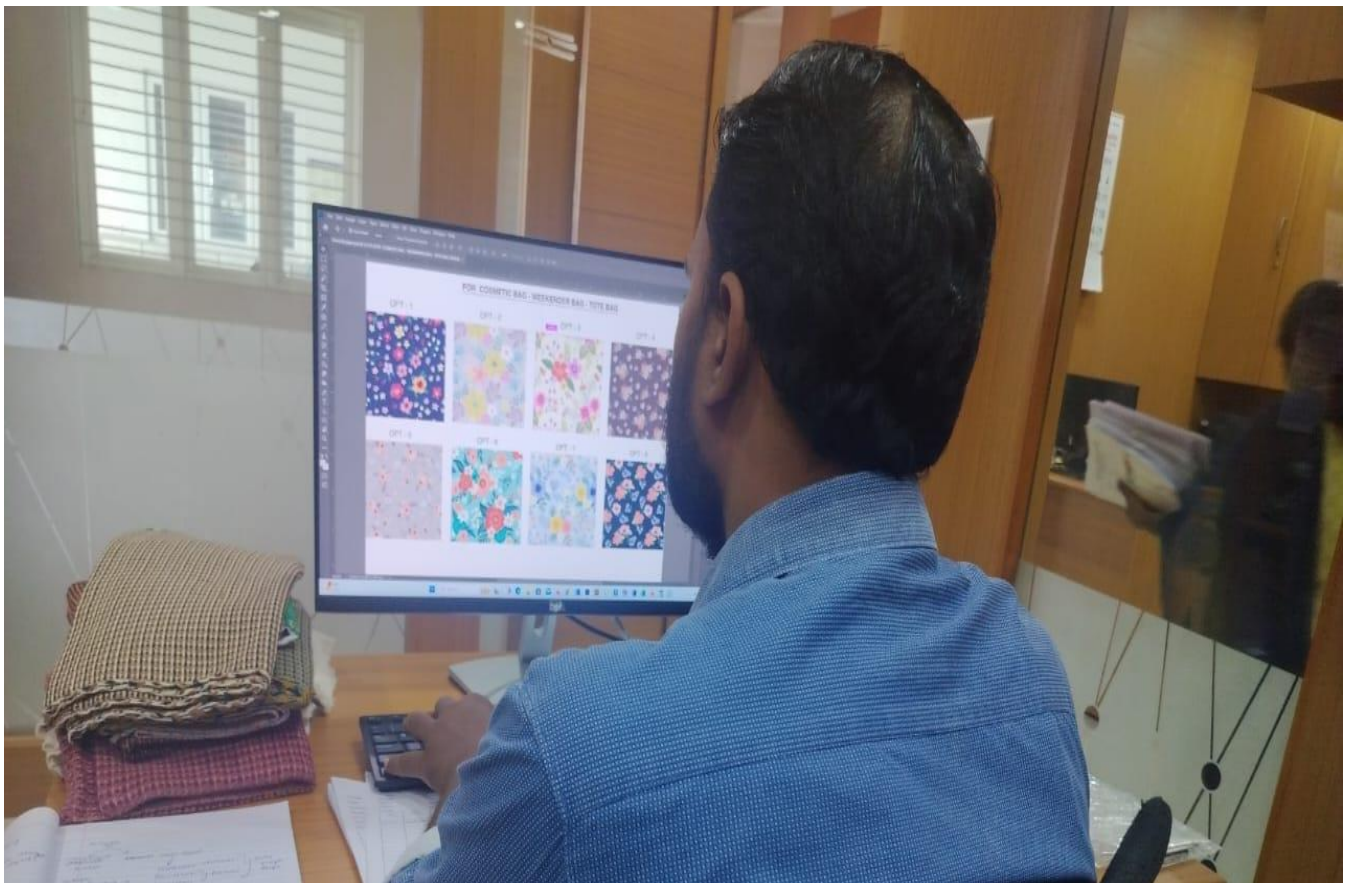

STORE ROOM

● DESIGNING DEPARTMENT

For textile design the designing is bases on what type of output we required it may be:

1. Print design
2. Woven design
- 3.Embroidery

DESIGNING

● **IRONING & PACKING DEPARTMENT**

IRONING SECTION

Ironing is the process of increasing the aesthetic quality of the garments for ironing steam ironing and vacuum tables are used. This process makes the garment more attractive and gives proper completion feel also it keeps the dress in shape.

Ironing procedure:

The checked garments iron without any wrinkles before packing in this section the steaming machines are used to supply heat. The steam is supplied to the iron box by the way of steam line.

- Removal of stain mark
- Removes the shrinkage
- Increase the aesthetic quality

- **PACKING SECTION**

Packing is the final section of production department when packing the garments, they use poly pack, carton boxes. The garments should be packed according to the packing order which has be given by the buyer.

PACKAGING

➤ **PACKING INFORMATION**

- Buyer name
- Order number
- Carton number

PACKAGING

● **MERCHANDISING DEPARTMENT**

The merchandising is the important and continuous process in the organisation. Let's see the role and works of merchandiser in the company.

Merchandiser acts as a mediator between factory and buyer. Responsibilities of the merchandiser are:

- Getting order from the buyer
- Planning the product and creating tech pack
- Costing and creating quotation
- Sampling – Proto and actual sampling
- Ordering necessary materials by communicating with all process handlers
- Flow monitoring
- Responsibility for inspection
- Product development
- Completion of product
- Getting reviews from the buyers
- Asking for next project or order

A merchandiser first communicates with the buyer about the order and do sampling like sending sample pieces to the buyer in a small quantity instead of producing the product in bulk. Once the buyer confirms the order the merchandiser do costing for the product. They plan how and when to produce the product and gives instructions to the production manager. The merchandiser is the person whose responsibility is to execute the orders as per the pricing or costing.

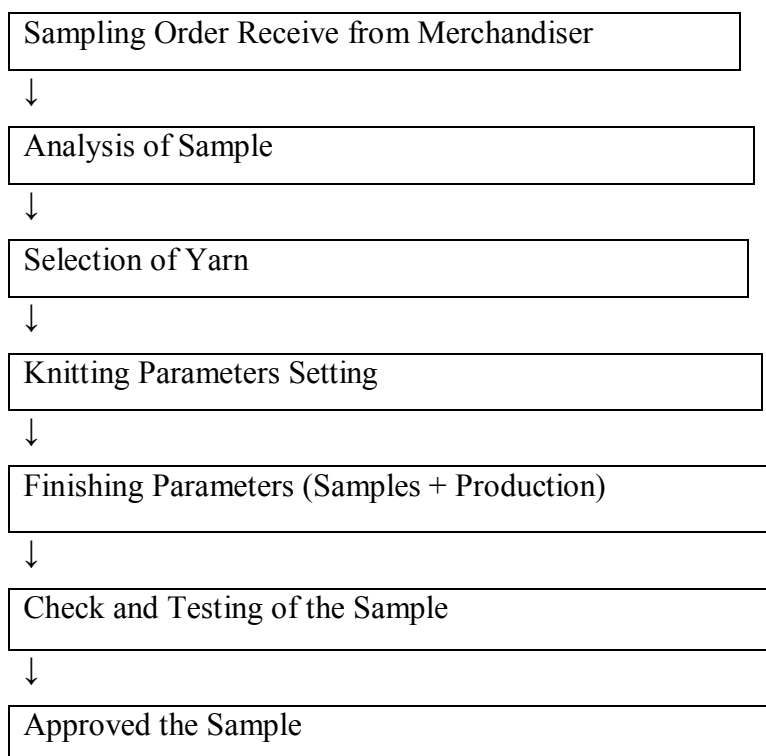

The merchandiser handles the foreign buyers. There are two types of merchandising done in this company:

- Product merchandising
- Marketing merchandising

● RESEARCH AND DEVELOPMENT DEPARTMENT

R&D (Research and Development) section plays a vital role in the overall production and quality of the fabric. The task of R & D section starts from fabrication and ends at the final inspection of the finished fabric. That is they used to follow up all the sections like fabric planning, knitting, dyeing, printing, finishing, lab, quality control and assurance etc. till the final finished fabric comes out.

➤ FLOW CHART OF R&D SECTION IN THE TEXTILE INDUSTRY IS AS FOLLOWS

➤ **R&D MODEL FOR GARMENTS INDUSTRY**

1. Idea generation: Idea could be generated from vacuum or complications, disputes, and difficulties. It can be intellectual, a combination of modules, theory of something that exists or conceptual.
2. Designing: It is a process of constructing ideas and information into the model and bringing it to reality with upgrading and development.
3. Selection: It is an integration of all the elements including color, feels, touch, shape, pattern, ratio, balance, measure, and comfort ability.
4. Product development: It is a process of intangible ideas and designs into a tangible product. It covers planning, sourcing materials, costing, and production.
5. SWOT analysis: We all may know SWOT stands for strengths, weaknesses, opportunities, and threats. It is quietly used to understand and analyze the position of a company.
6. Production: It is a dependable of a serial and progressive process of converting and assembling raw materials like yarn, fabric, and accessories into final and finished garments.
7. Sales and marketing: Sales lead to the selling of garments and marketing is the process of getting customers and wearers interested in our garments, which are getting sold.
8. Feedback: Based on feedback from customers, suppliers, we are able to update and upgrade the product with better quality.

● MACHINE MAINTENANCE DEPARTMENT

The maintenance department is enhanced with various professionals who work for maintaining the continuous production system and keep machinery in working condition. Maintenance Department is one of the most important parts of the factory. The maintenance department is mainly responsible to look after the machines and other production equipment in proper working condition and take corrective action against any environmental pollution. A good Maintenance Department applies different types of maintenance techniques in the RMG Sector.

Maintaining and servicing machine on a regular basis is very important work in the production as well as other process. The department's main purpose is to perform scheduled maintenance of plant equipment that lessens the possibility of that equipment failing prior to its life expectancy. Aside from servicing and maintaining existing equipment, maintenance workers are also called on to replace worn out equipment. This is an ongoing process that continues throughout the life of the plant; as equipment grows old, it is replaced and or upgraded before it fails and causes an unscheduled event to occur. This department staff are responsible to maintain good environment and keeping the things properly arranged. They are responsible for smooth running of all the process in the organization.

➤ KEY FUNCTIONS OF THE MAINTENANCE DEPARTMENT ARE

- ❖ Inspection of sewing machines and other machinery in the factory, repairing and up gradation.
- ❖ Maintaining and ensuring continuous power supply in the factory.
- ❖ Maintaining proper water supply, compressors, boilers etc.
- ❖ Planning, design and implement any kind of expansion of the factory.
- ❖ Supply purified water for factory using and washing plant.
- ❖ Maintain WHO standard PH value for ETP (Effluent Treatment Plant).Purchase of new machinery.
- ❖ Issuing of different spare parts and accessories according to the production requirement.
- ❖ Housekeeping.
- ❖ New constructions, paintings, and furnishing of the factory.

➤ **INSPECTION**

The members of the department usually a supervisor or foreman who is responsible to supervise and influence in the productivity of the subordinates assigned under them. They must ensure whether the work is not stopped for any reason. They are responsible for the routine schedule checks of the plant facilities to examine their condition and to check for needed repairs. They also ensure the safe and efficient operation of equipment and machinery. The frequency of inspection of different machines is based on the type of the machines.

➤ **HOUSE KEEPING**

The house keepers are also the part of this department as they maintain the work place by cleaning them on regular basis which enables the workers to work freely and comfortably in a neat environment. The house keepers perform the works like brooming the work place, as cleaning the office rooms and cleaning the machines. The helpers in each section of the production department also carries the work of brooming like clearing the opened packs of raw materials, and taking away the wastes which occurs in the production process, lubricating the machines on regular basis and cleaning the essential parts of the machines.

● **DOCUMENTATION DEPARTMENT**

Documentation is very essential for exporters and for Quality Control department. The foreign buyers ask of export documents for buying the product or for giving the orders and the Quality Control department can't give some QC stickers (i.e.) tags without the documents. This department is also essential for Research and Development department for getting patterns for new products with all the proper documents. They also carry out the function of maintaining legal documentations which is asked by the bankers and government. The company has lot of certificates to seek the attention of the buyers and also, they use these certifications to avail government schemes, loans. These certificates are used to show the uniqueness of them from other companies.

(vii) CONCLUSION

In duration of 15 days of industrial training I have learnt a lot of things. This industrial training has been an excellent and rewarding experience. This industrial training made me to know the real and wider field of work. During this training I had an opportunity to interact with different people in the organization. I learnt the importance of communication in the workplace. During this training I gained more experience and knowledge in the field of textiles. The training was very interesting with lots of things to be learned. It helped me to acquire knowledge on punctuality, regularity and working environments in industries. The working environment in Priya Handloom is so friendly. In conclusion, the industrial training provided very good exposure and knowledge and also helped to enhance the communication and problem-solving skills.

I learned how to bargain with buyers, how to get orders and also learnt what are the challenges faced in business. This Industrial Training gave me a basic idea of how the business operates and I learnt how to deal with the workers and other managers as well as this gave me an experience of business and shows me the opportunities I have in future. I also learnt the complete process of producing a garment and various functions of each department staffs in the process of production. It was very good experience for me to learn that what was really happening in the real commercial world closely and it gave me a clear idea that how I should equip myself to face the real business situation. I learned more qualification, presence of mind and commonsense which takeover the ultimate in the world of commerce. I hope his training program will definitely help me in future to develop my carrier.
